# MagicQ PC Mini Wing

The MagicQ Mini Wing is an extremely powerful USB control wing for connecting to your PC or Mac to control lighting, video and LED with the MagicQ PC software. MagicQ PC software runs under Windows, Linux or OSX. MagicQ PC software is free and uniquely the outputs are fully enabled, allowing you to run shows on up to 18 Universes.

The MagicQ Mini Wing is the smallest wing in the MagicQ range, designed for playback of MagicQ shows. The MagicQ Mini Wing is targeted at installations, which are generally programmed only once and changed infrequently. It also provides a cost-effective solution for individuals with small budgets, and as a useful back-up for MagicQ consoles.

The Mini Wing has one fully patchable direct DMX output. Connection to the PC is via USB. Power is taken from the USB connection, so there is no need for an external power supply. The Mini Wing connects to any PC running the MagicQ PC Software. As with the original PC Wing, additional DMX connections can be made via Ethernet.

The MagicQ PC software is the same software that MagicQ consoles run - enabling familiar and flexible GUI lighting control, media server connectivity options and in-built media server for LED grid arrays. And with the ability to transfer your show to other MagicQ consoles over the network or using standard USB memory sticks the MagicQ PC Wing can be used as a powerful off-line show editor or back-up system.

The MagicQ PC Mini Wing provides an immensely powerful PC based console ideal for installing into theatres, clubs, and venues for controlling lighting, video and LED. The Mini Wing is physically very small and light, making it a very attractive solution for Lighting Designers to take with them when they travel. There is no other product available that gives the power of the MagicQ software combined with real faders and buttons, and a DMX output.

## Specification

Universes	18
Channels	9216
Number of fixtures	Up to 9216
Cues	5000
Cue Stacks	2000
Palettes	3096
Groups	1000
Numbers of shows	Virtually unlimited
Media Server support	50 (each different content)
Encoders	0
Faders	11
Buttons	35
Direct DMX512 ports	1
Dimmable LED console lamps	0
Remote trigger input	0
Security lock fixing	1
Choice of colours	Blue
Power Sy-supply	USB powered
Width	260mm
Depth	184mm
Height	50mm
Weight	2 kg

## Features

Tracking / non-tracking option  
 Fixture, FX and Gel Library  
 In-built Fixture Editor  
 In-built Media Engine  
 LED pixel mapping  
 Fixture morphing and cloning

Rainbow colour picker (RGB, HSI)  
 Individual fade times on any channel  
 Easy fanning of parameters and times  
 Configurable faders - HTP, LTP, speed, size, masters  
 Theatre mark cues, split fades and inhibit masters

Client/Server network architecture  
 Multiple console Playback Tracking  
 In-built Web Server  
 Remote console control  
 Visualiser support (including patch transfer)  
 Architectural Zoning and Day/Date support

MIDI & SMPTE option  
 PVC Flight Case
